WE CARE ABOUT THE CRAFT

Tel: 888-387-3280

The background of the page features a photograph of a traditional Japanese building with a tiled roof and a garden. The building has a dark wooden frame and a tiled roof with a curved eave. The garden in the foreground is lush with green grass and several large, dark, rounded rocks. There are also some green bushes and trees in the background. The overall scene is peaceful and serene, reflecting the Wabi-Sabi aesthetic.

Wabi-Sabi

The Japanese principle of Wabi-Sabi dates back to 16th century Japan. It is an aesthetic that teaches us to embrace the impermanent, appreciate imperfection, and find beauty in all things. Wabi-sabi can be manifested in the physical with earthy tones and textures, and purposeful imperfections such as cracks and color variegation.

Our Zen & Clay Tile collection delivers this unique aesthetic with exceptional quality and craftsmanship. This collection has been carefully crafted to embrace natural hues, harmonious textures, and serene spaces.

Unglazed Concave Hex pattern in Waterblend

GODAI SERIES

The Godai refers to the five elements representing the Buddhist universe: earth, water, fire, wind and sky. Many representations of this philosophy are found in Japan, most notably in Buddhist architecture. The colors in this collection evoke these five great elements.

Thickness: 1/4"						

HANAKAGO SERIES

Hanakago is the traditional art of weaving bamboo to create elaborate, sculptural flower baskets. The texture on the surface of the tile reflects this aesthetic. The pillowed porcelain body allows the glaze to pool, resulting in unique variation and depth of color.

MIYABI SERIES

The concept of the miyabi aesthetic has evolved over time. The original meaning of refined elegance has expanded to include a more organic admiration of sights in nature. It means more than just pretty, it implies that everything is "just so".

Our Inspiration

Natural hues, traditional forms, harmonious textures, serene spaces. Tranquil spaces are created by bringing natural elements inside and reimagining ceramic surfaces with earthen textures. Envision creating a sacred space of calm in your home. Japanese tilework captures an essence of the natural state of artisan ceramics in a range of visual and physical textures.

Design Resources

Our historic tile is beautifully crafted with design, tradition and functionality in mind. Whether you're looking for a classic design or want to use historically authentic tile for a more modern installation, we've got the tools to help you achieve your dream space.

HERITAGETILE.COM:

Our website provides an optimal viewing experience for architects and interior designers. Catalogs, design guides, assembly diagrams, inspiration images, and test certifications are right at your fingertips. This easy-to-access information is designed to help you evaluate, present, and select inspiring tile solutions for your projects. You can also easily order sample books and cards to review our colors and product quality first-hand.

SAMPLE PROGRAM:

No two projects are alike. We offer resources to meet the unique design challenges of your space. Our Sample Books and Cards are a hands-on way to see the quality, beauty and character of our product. Request our sample books and cards to keep in your material library for reference.

DESIGN CONSULTANTS:

Consider Heritage Tile as your partner committed to the success of your project. We sincerely care about our craft, and are eager to share our experience and design resources with you. Design Consultants are here to assist you from concept and design, to installation and maintenance. We will answer questions and keep you updated with new products, exciting projects and design inspiration. Our commitment is always to you, feel free to reach out with design questions, sample requests, or order specifications. We are ready to help.

EDUCATION AND DEVELOPMENT:

Continue your education with Heritage Tile. Our AIA/IDCEC accredited CEU programs offer something for everyone. Whether you are interested in the dynamic changes of thought and design at the turn of the century, or are curious how a 16th century Japanese aesthetic is connected to Frank Lloyd Wright, we have a course for you.
