

Sustainability Principles & Objectives

Our Vision

The Earth is currently at a crossroads. It's time we include the environment and its peoples into the principles we hold at Capital Electric. We believe that sustainability runs in tandem with our mission statement and values. We will strive to make the innovative and ethical changes to make our future more efficient and equitable. Our investments in cleaner energy, efficient means of distribution, and reduction in waste will not only demonstrate Capital Electric's commitment to a cleaner future, but embolden our customers and partners to look toward the opportunity that lies in front of them.

We understand Sustainability is a wide reaching term and broad. Thus, we have chosen to focus our goals on those that match our business. In particular, we will align with the Science Based Targets (SBT), developed by the CDP, UNGC, WRI, and WWF, as well as five of the UN's Sustainable Development Goals (SDG):

5 GENDER
EQUALITY

8 DECENT WORK AND
ECONOMIC GROWTH

9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE

12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION

13 CLIMATE
ACTION

Our Strategy

1. **Collaborate** with vendors to create an efficient and sustainable circular economy while remaining profitable.
2. **Optimize** our infrastructure and distribution chain in efforts to reduce our internal carbon footprint.
3. **Educate** and **assist** customers to become profitable, successful, and fellow stewards in the world's current energy transition.
